The stationary engineers of Bingham have organized as a subordinate of the National Association of Stationary Engineers. They are known as Utah No. 2. State Deputy W. H. Kibbick of Salt Lake was here to help the boys install their order. An interesting part of the order is the educational part, as each member has a text-book of helpful instructions, and at each weekly meeting discussions to help all are brought up. The order is purely to help one another and to better quality members for their work, and they wish to reach a point where if a man is not competent he will not be employed as a stationary engineer. The national organization was organized in 1882, and this is the first subordinate or branch order ever organized in Bingham.
